

Institutional Pharmacy

Institutional Pharmacy Solutions

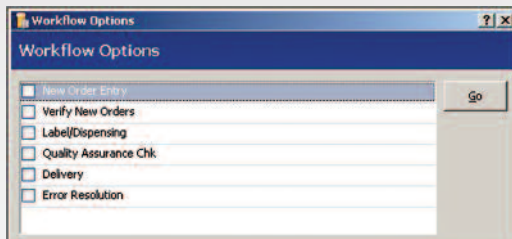

QS/I®'s PrimeCare® is flexible making it an excellent choice for any institutional pharmacy whether long-term care, mental health, assisted-living, board-and-care or corrections. PrimeCare provides the pharmacy with the ability to customize software parameters to fit the facility's unique needs using the facility management functions.

Order Entry and Processing

QS/I's easy-to-learn, intuitive Windows-based design allows users to choose from mouse or keyboard navigation. Desktop menus and taskbars provide fast access to many areas of the system, often in just one click of the mouse. Process demand fill, cycle fill or unit dose exchange. When unit-dose processing, users can customize the fill list to fit a variety of dispensing intervals and systems. And, dispensing and billing can be managed independently.

Manage Your Workflow

The dispensing process includes order entry, pharmacist verification, labeling/packaging, quality assurance with

resolution queue to avoid delay. And full help documentation, tutorials and what's new are available in just one click.

NDC bar code verification and drug images, and delivery with bar code tote checking. Orders that require additional attention can be pushed to the error

Manage Accounts Receivable and Billing

Enjoy comprehensive financial data management with easy posting, reporting and tracking of private pay and facility charges with a variety of accounts receivable reports. Easily process statements, trial balances and departmental reports with electronic claims reconciliation. The billing rules for order processing can be maintained at the facility level in the facility billing matrix and maintained in the patient billing matrix by the billing department. Third party receivables are also easily reported and tracked. Reconciliation of claims, both manual and electronic, including 835, is included.

Efficient Claims Processing

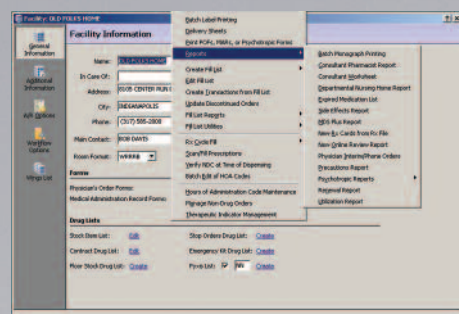

Process claims quickly and easily with QS/1's PowerLine™ claims switch. QS/1 provides dial-up or Internet claims submission in real time or batch mode and provides the ability to send multiple claims for multiple patients to multiple carriers.

Comprehensive Clinical Management

QS/1's PrimeCare has a full suite of clinical functions including screening for drug-drug interactions, therapeutic duplication, drug-disease contraindications, drug allergies, geriatric precautions, drug-food precautions and adult min-max dose checking. Use the system to document clinical interventions as well as track lab, immunizations and therapeutic management to monitor patient progress.

Flexible Reporting

QS/1's PrimeCare makes it easy to generate the reports required in institutional pharmacy. Easily

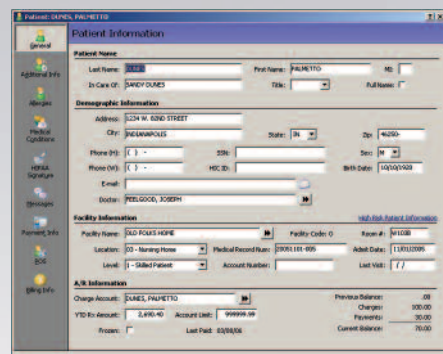

customize standard reports by altering the select and sort criteria or create your own custom

reports. An optional tool enables you to export pharmacy data into your favorite spreadsheet or database for further manipulation.

Built-in Medical Records

PrimeCare contains a full complement of medical-records forms, including more than 65 POF and 65

MAR formats, as well as treatment sheets and psychotropic monitoring sheets. Many forms are also available for laser printers.

Connect Pharmacy and Facility with WebConnect™

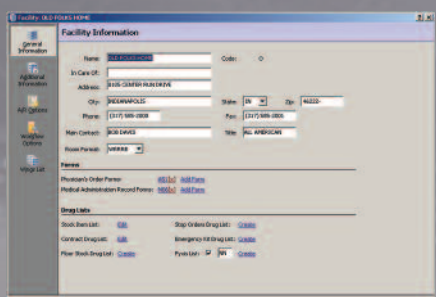

QS/1's WebConnect is an easy-to-use tool that provides pharmacy-facility connectivity, providing web access to pharmacy information right from the nurses' station. WebConnect saves time, increases

efficiency and productivity, and allows the pharmacy to raise the level of customer service through sharing of information.

- Look up patients and view profiles
- Order new or refill medications online. Refills go directly into the pharmacy system queue, eliminating fax requests
- Maintain ancillary orders
- Access clinical information online
- Ensure security with facility specific log-in and password

Industry-standard HL7 Interfaces

Using QS/1's real time and batch mode interfaces and industry standard HL7, interfaces to connect to automated dispensing systems, counting and packaging machines, ADT systems, billing systems, e-prescribe networks and many other productivity tools.

PrimeCare OnDemand™

Want to avoid the headache of managing a computer network? QS/1's PrimeCare OnDemand is a hosted solution, available for the small pharmacy that needs the power of PrimeCare but does not have the budget or manpower for an in-house system.

Platform

PrimeCare operates in a Windows® 2000/XP environment using TCP/IP and Ethernet for maximum connectivity.

Additional Products

QS/1 offers multiple-site pharmacy management through its Enterprise solutions. Other products include our premier retail and chain pharmacy packages, retail front-end POS management, integrated interactive voice response system and a home medical equipment management system.

Training and support

Regional training centers with experienced and dedicated PrimeCare software specialists provide high quality training. Throughout the year, regional offices present training seminars on a variety of topics. Through a highly trained support center, QS/1 provides customer support, including hardware and network consulting and installation.
